Lean Methods work
if they feel light!

light?

You do not feel that
you are using a
Method like Kanban...

... and you have fun using it ;)

Kanban Spaceships

Why do we have fun with it?

In the Beginning there was:

- ⚡ Phases with working over Capacity
- ⚡ Missing Transparency
- ⚡ Work seems not be „planable“
- ⚡ Low amount of focused Communication
- ⚡ Powerlessness -> frustration

Me: Yeah – KANBAN!

Everyone else: Kan... wtf?

„Chaos – even more than before“

„I get scared of the wall“

„It reminds me of the work which is still to be done“

UNSEXY!

Me: Yeah - KANBAN!

Rest: Okay, you mentioned
that thing before...

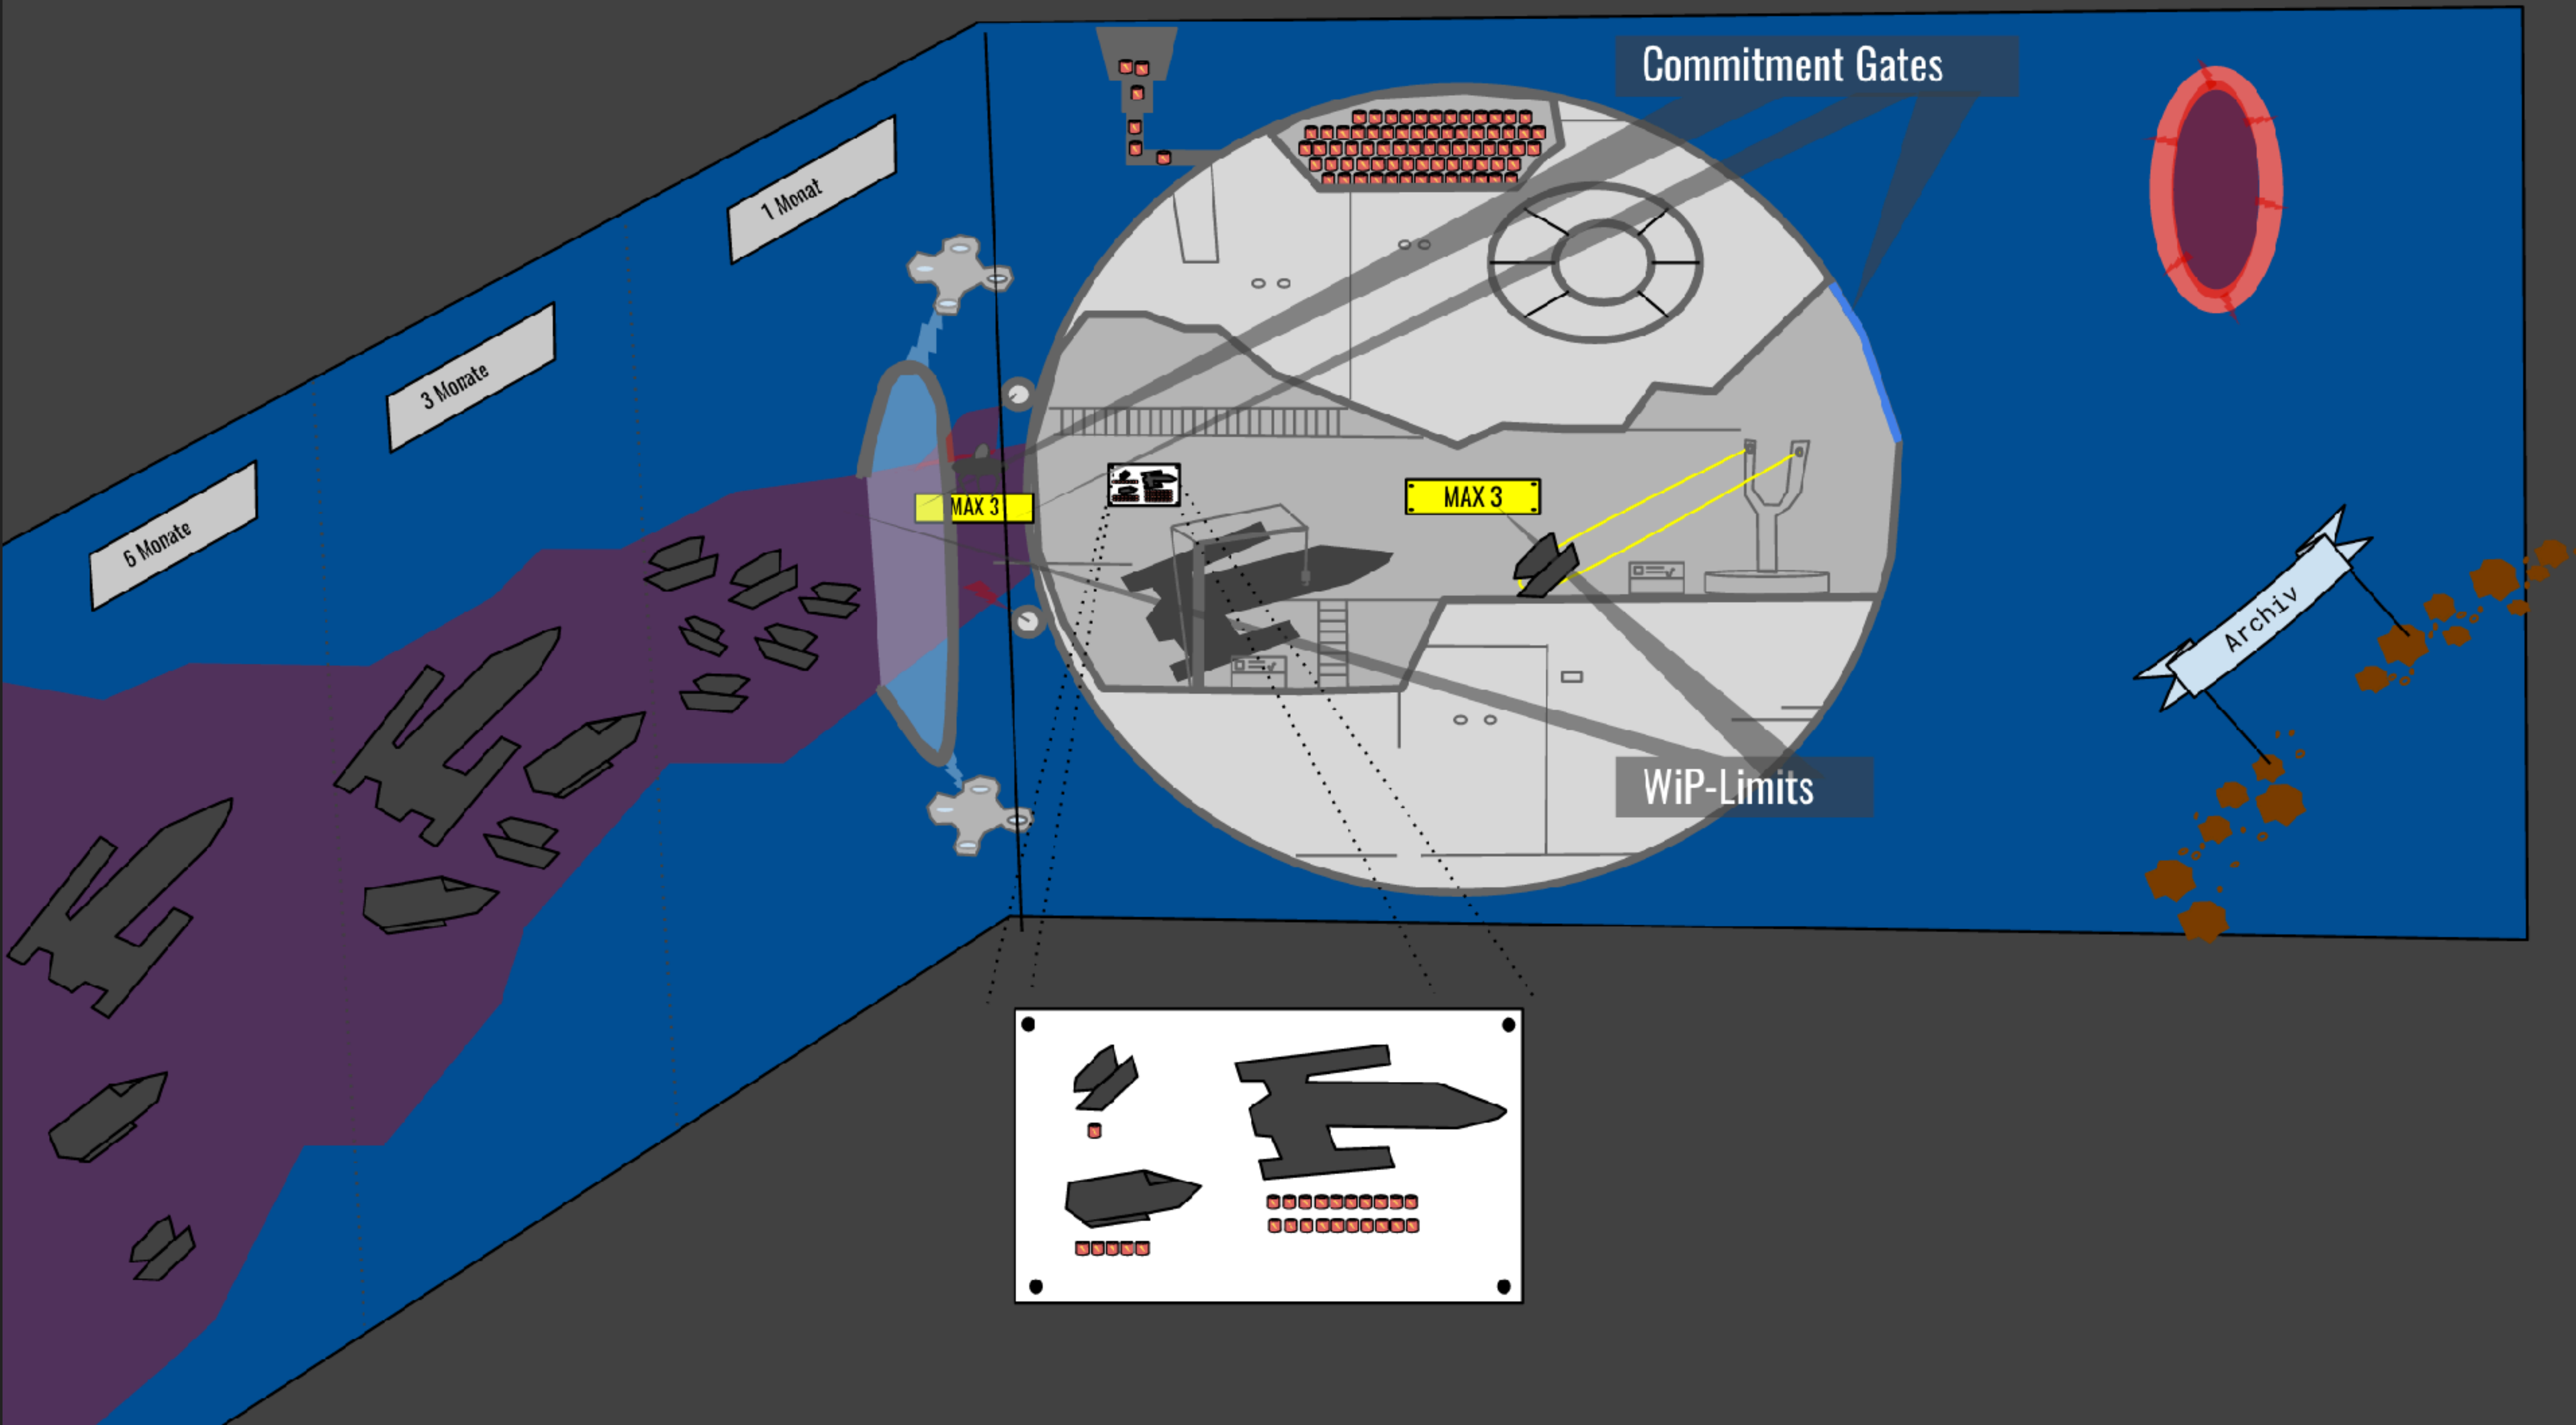

Whatever helps..

click ;)

Me: Yeah – KANBAN!

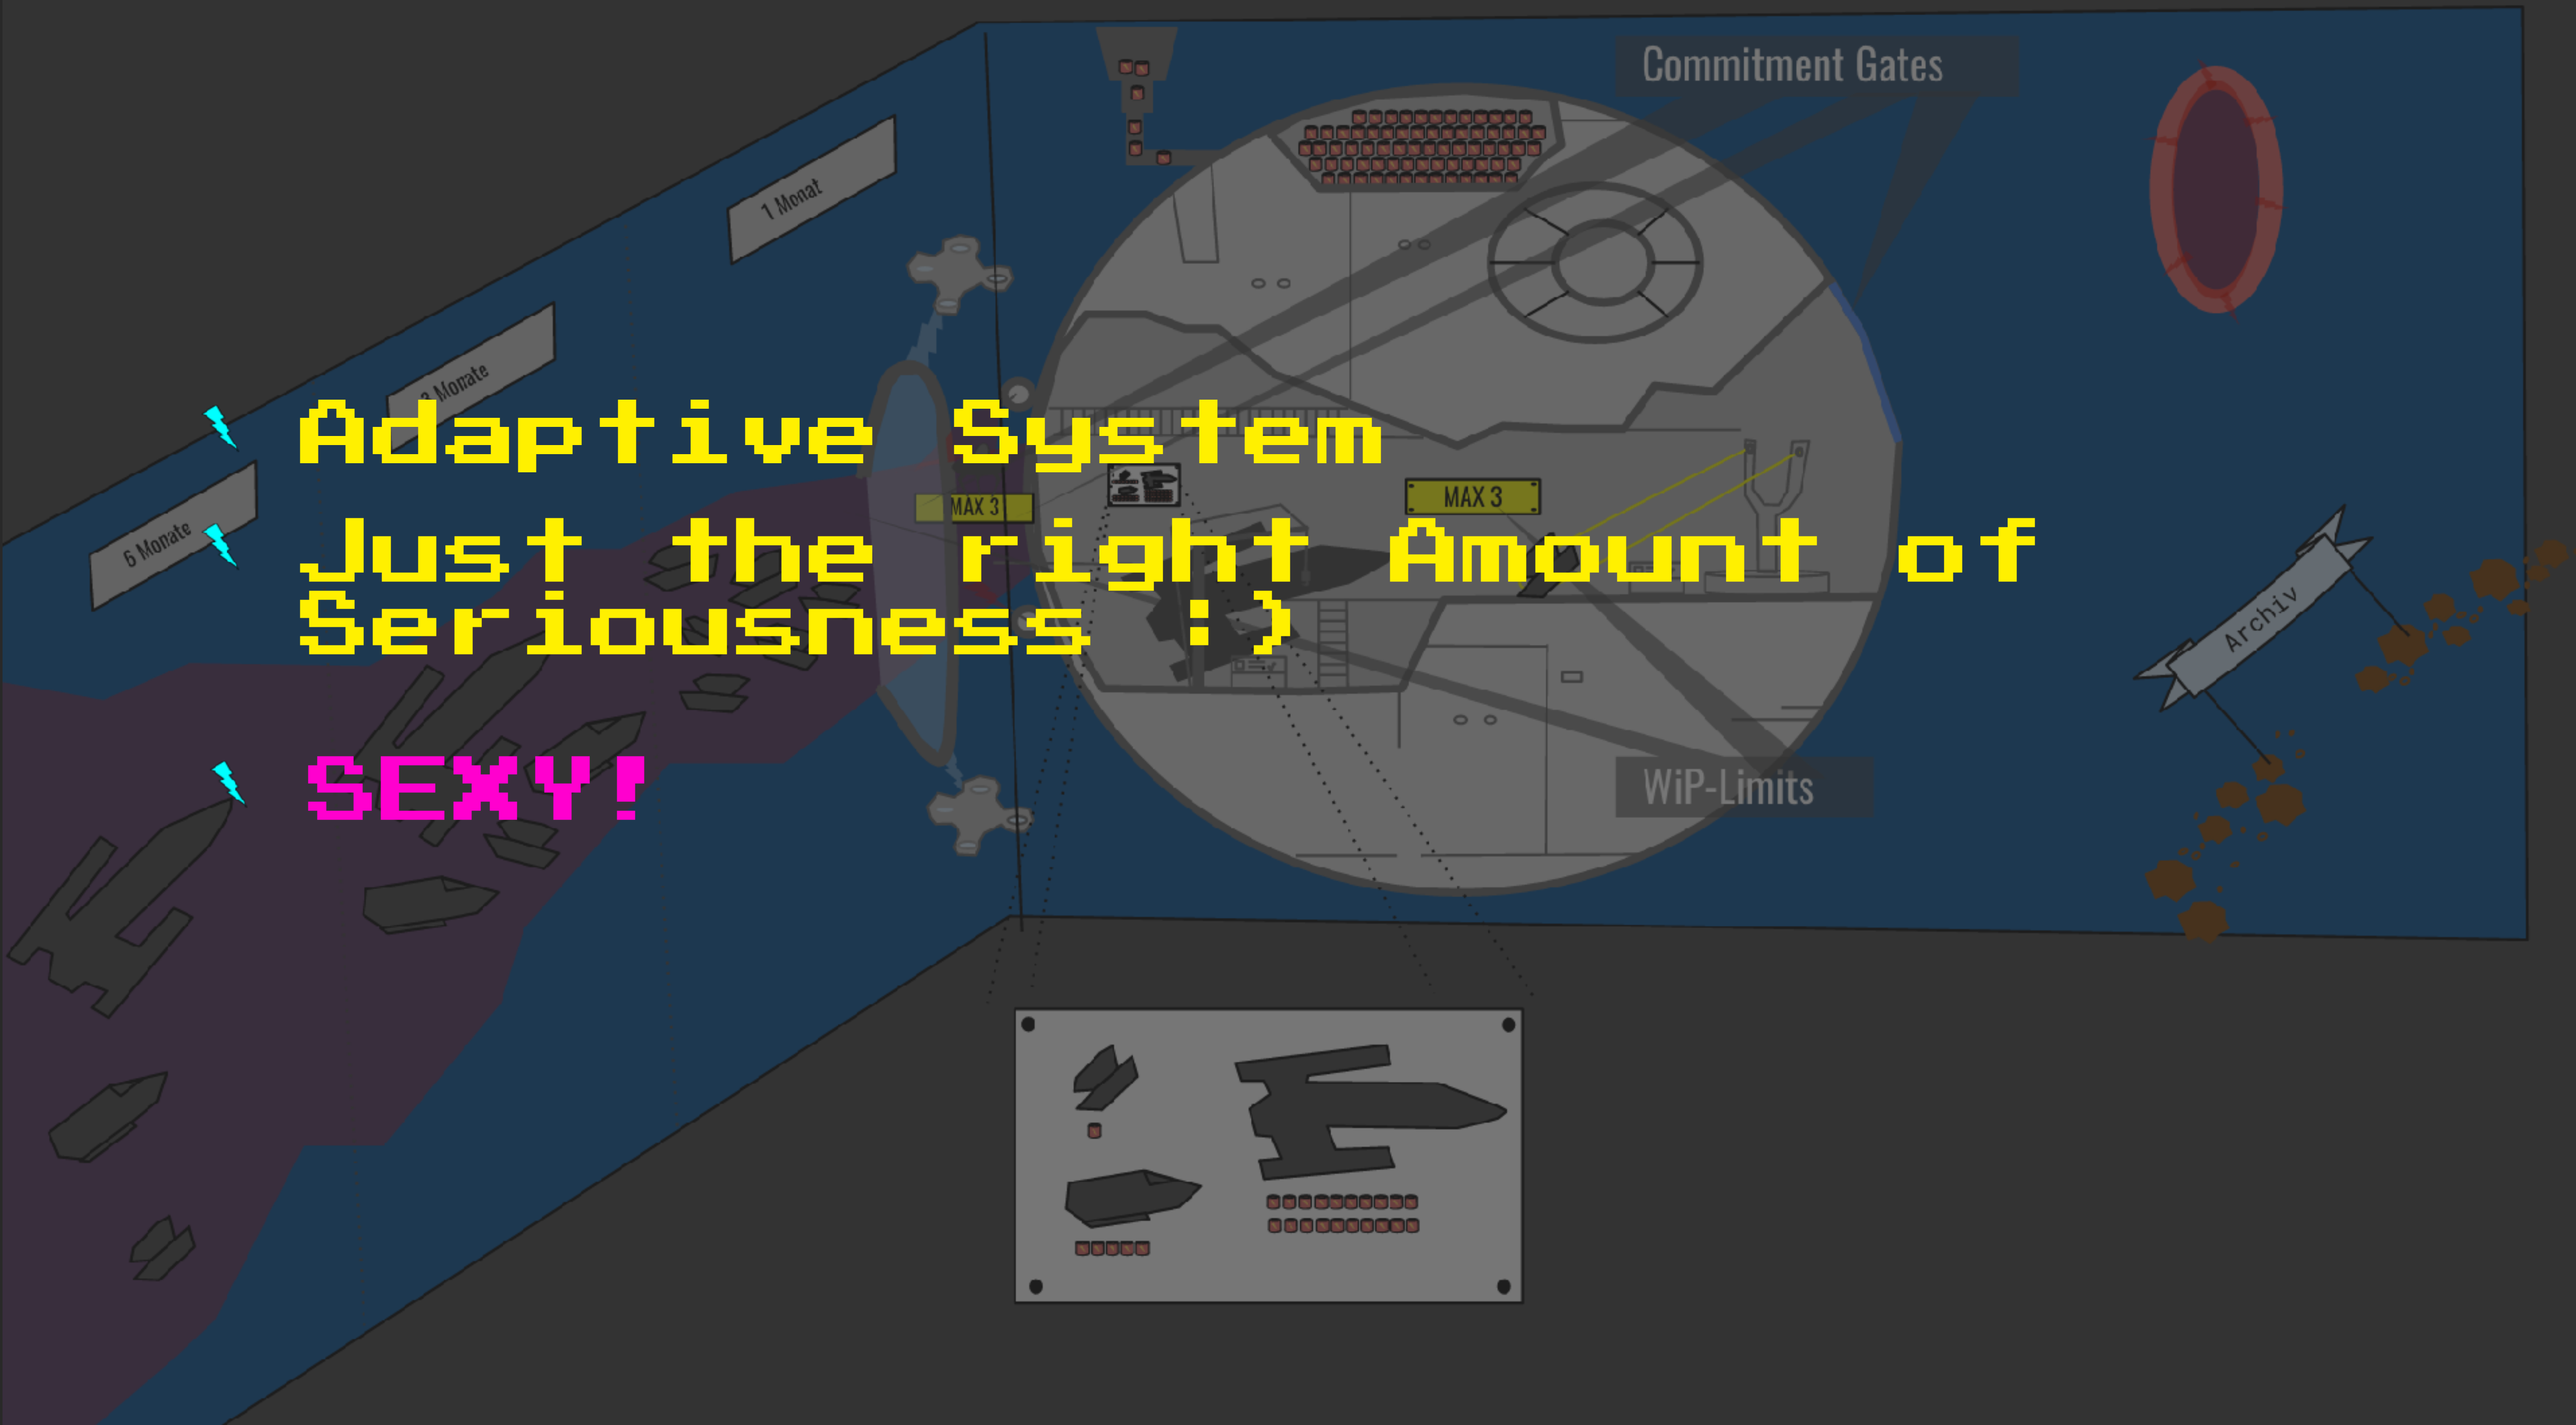

Me: Do you know the relationship between Effort and Capacity? And our natural „Brain-Advantage“ of relative Estimations? And do you know $L = \lambda W$? ...

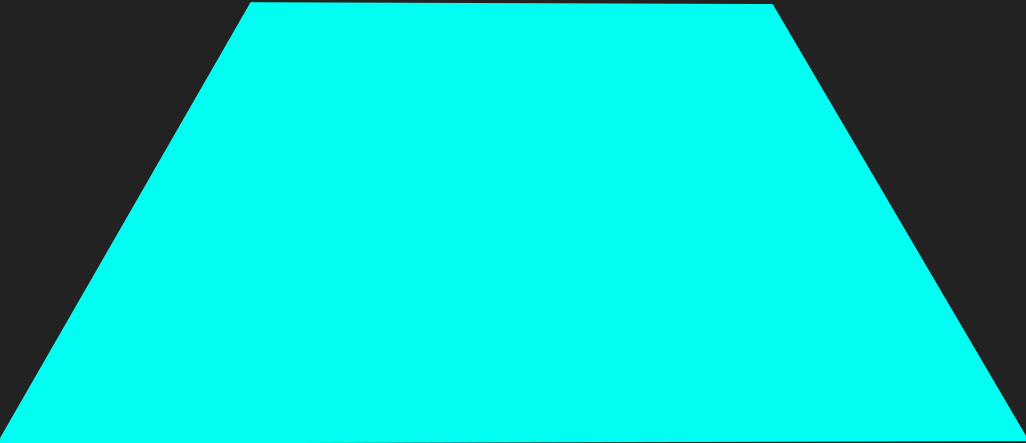

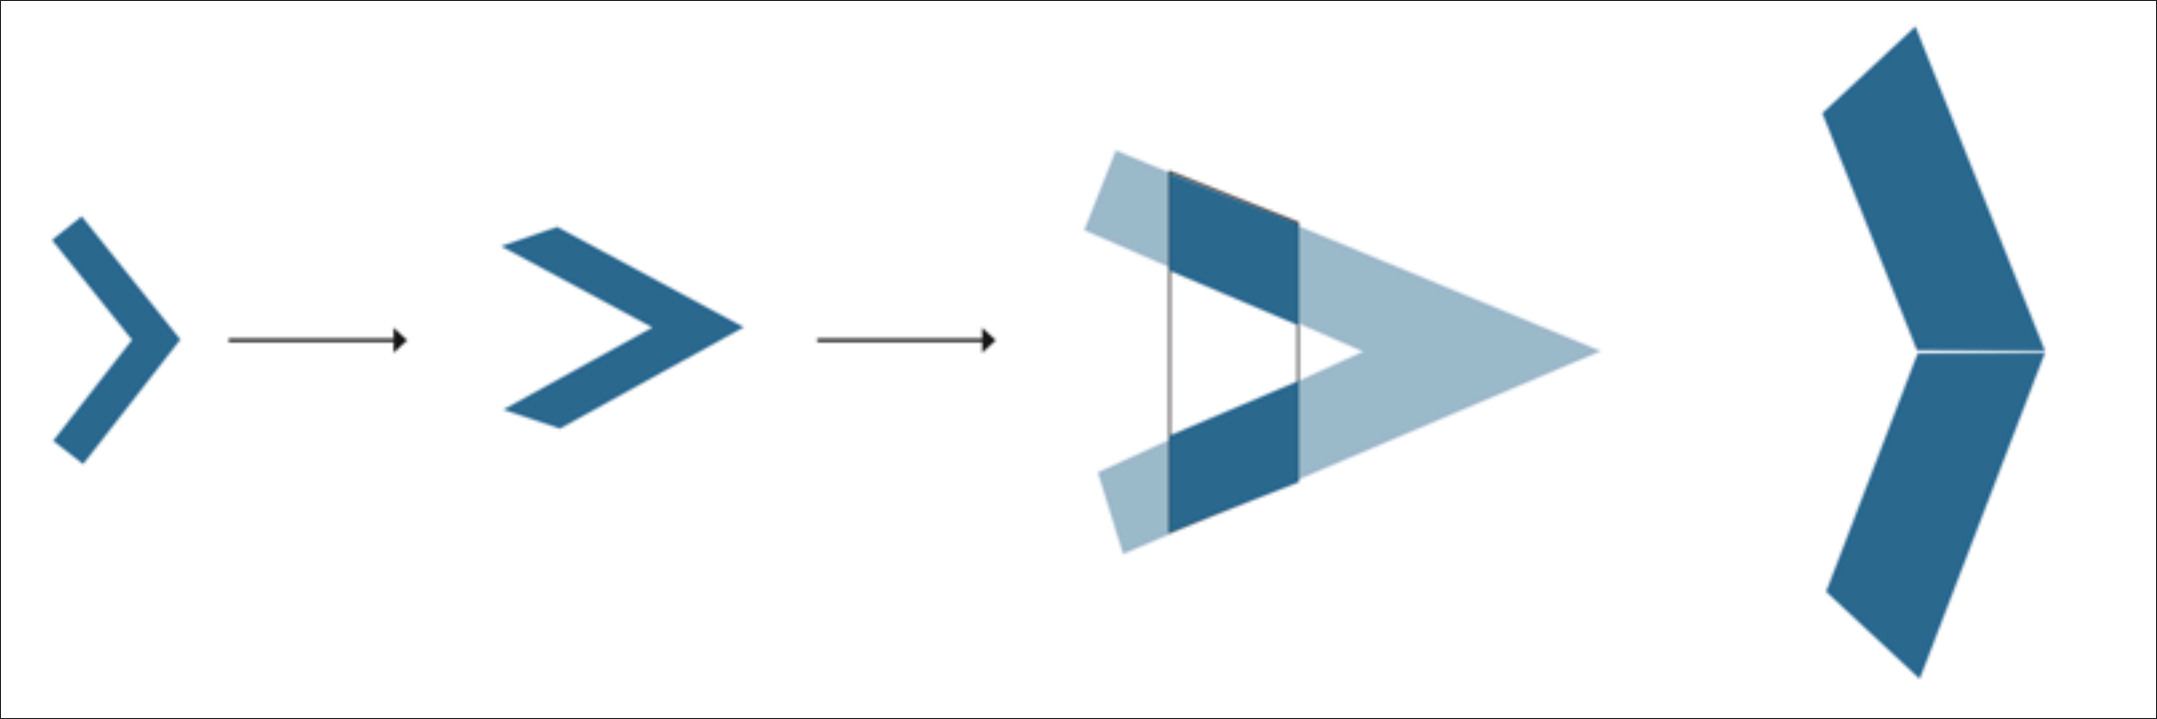

Adaptive System

Just the right Amount of
Seriousness :)

SEXY!

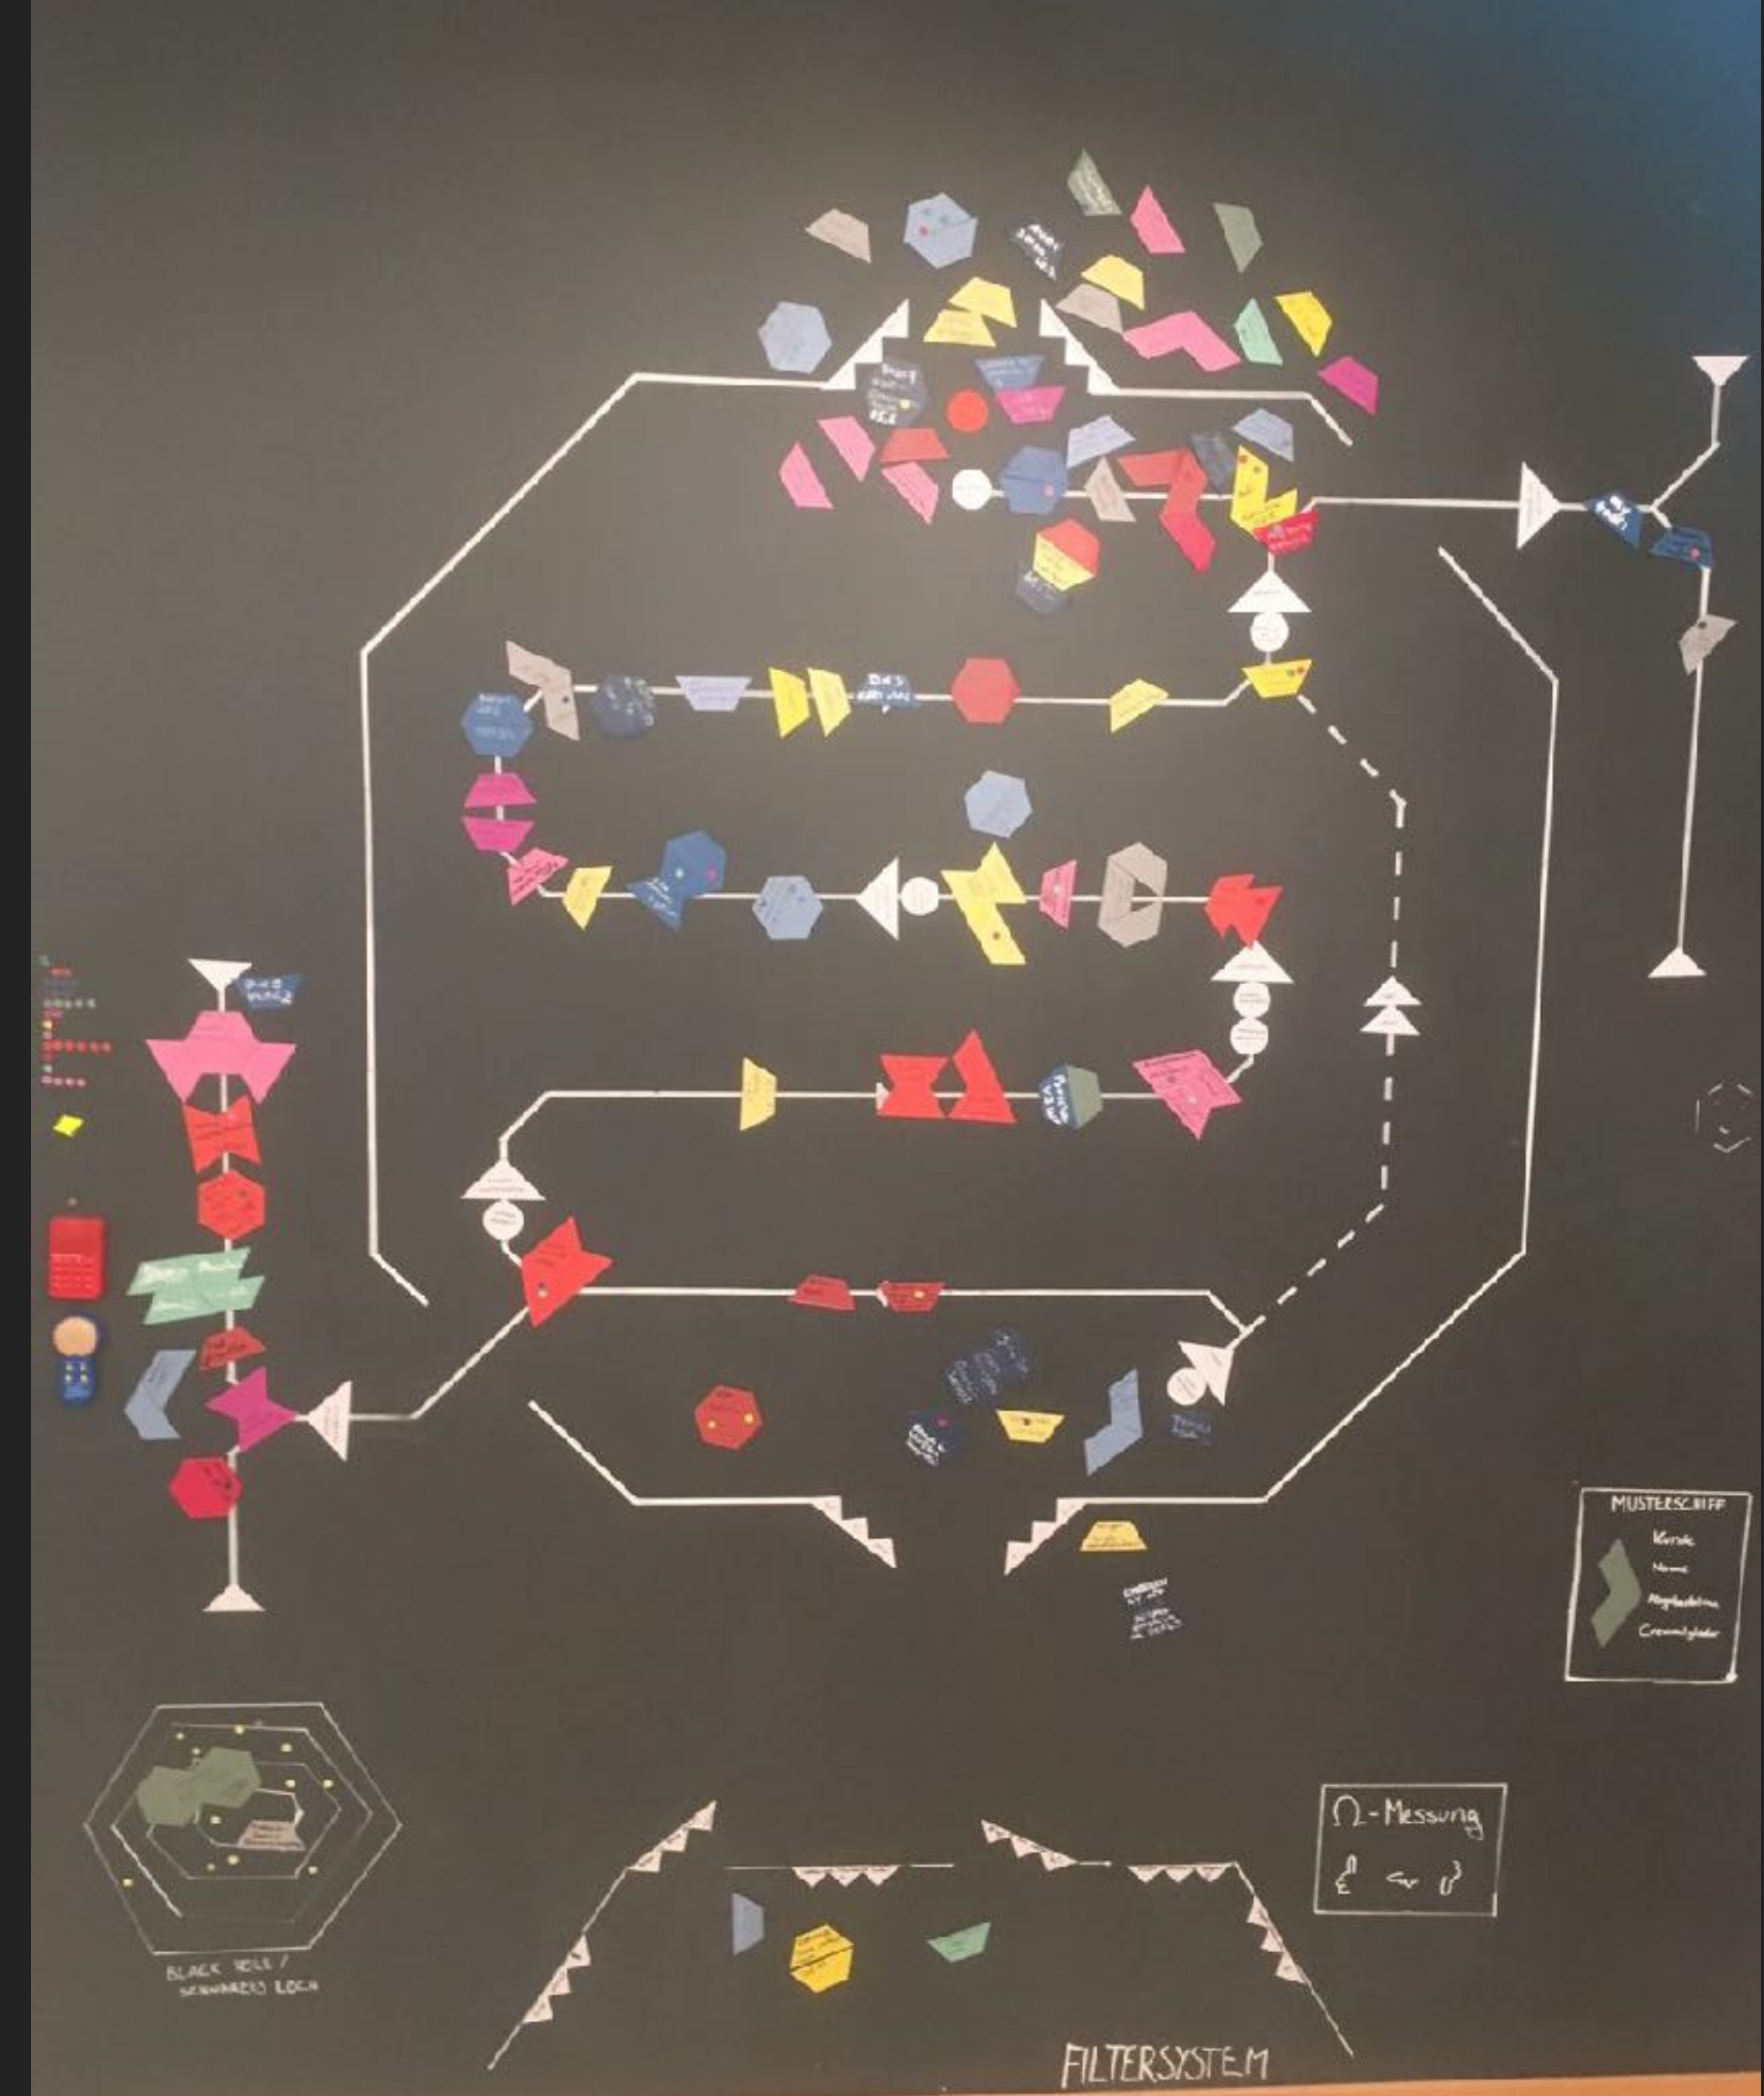

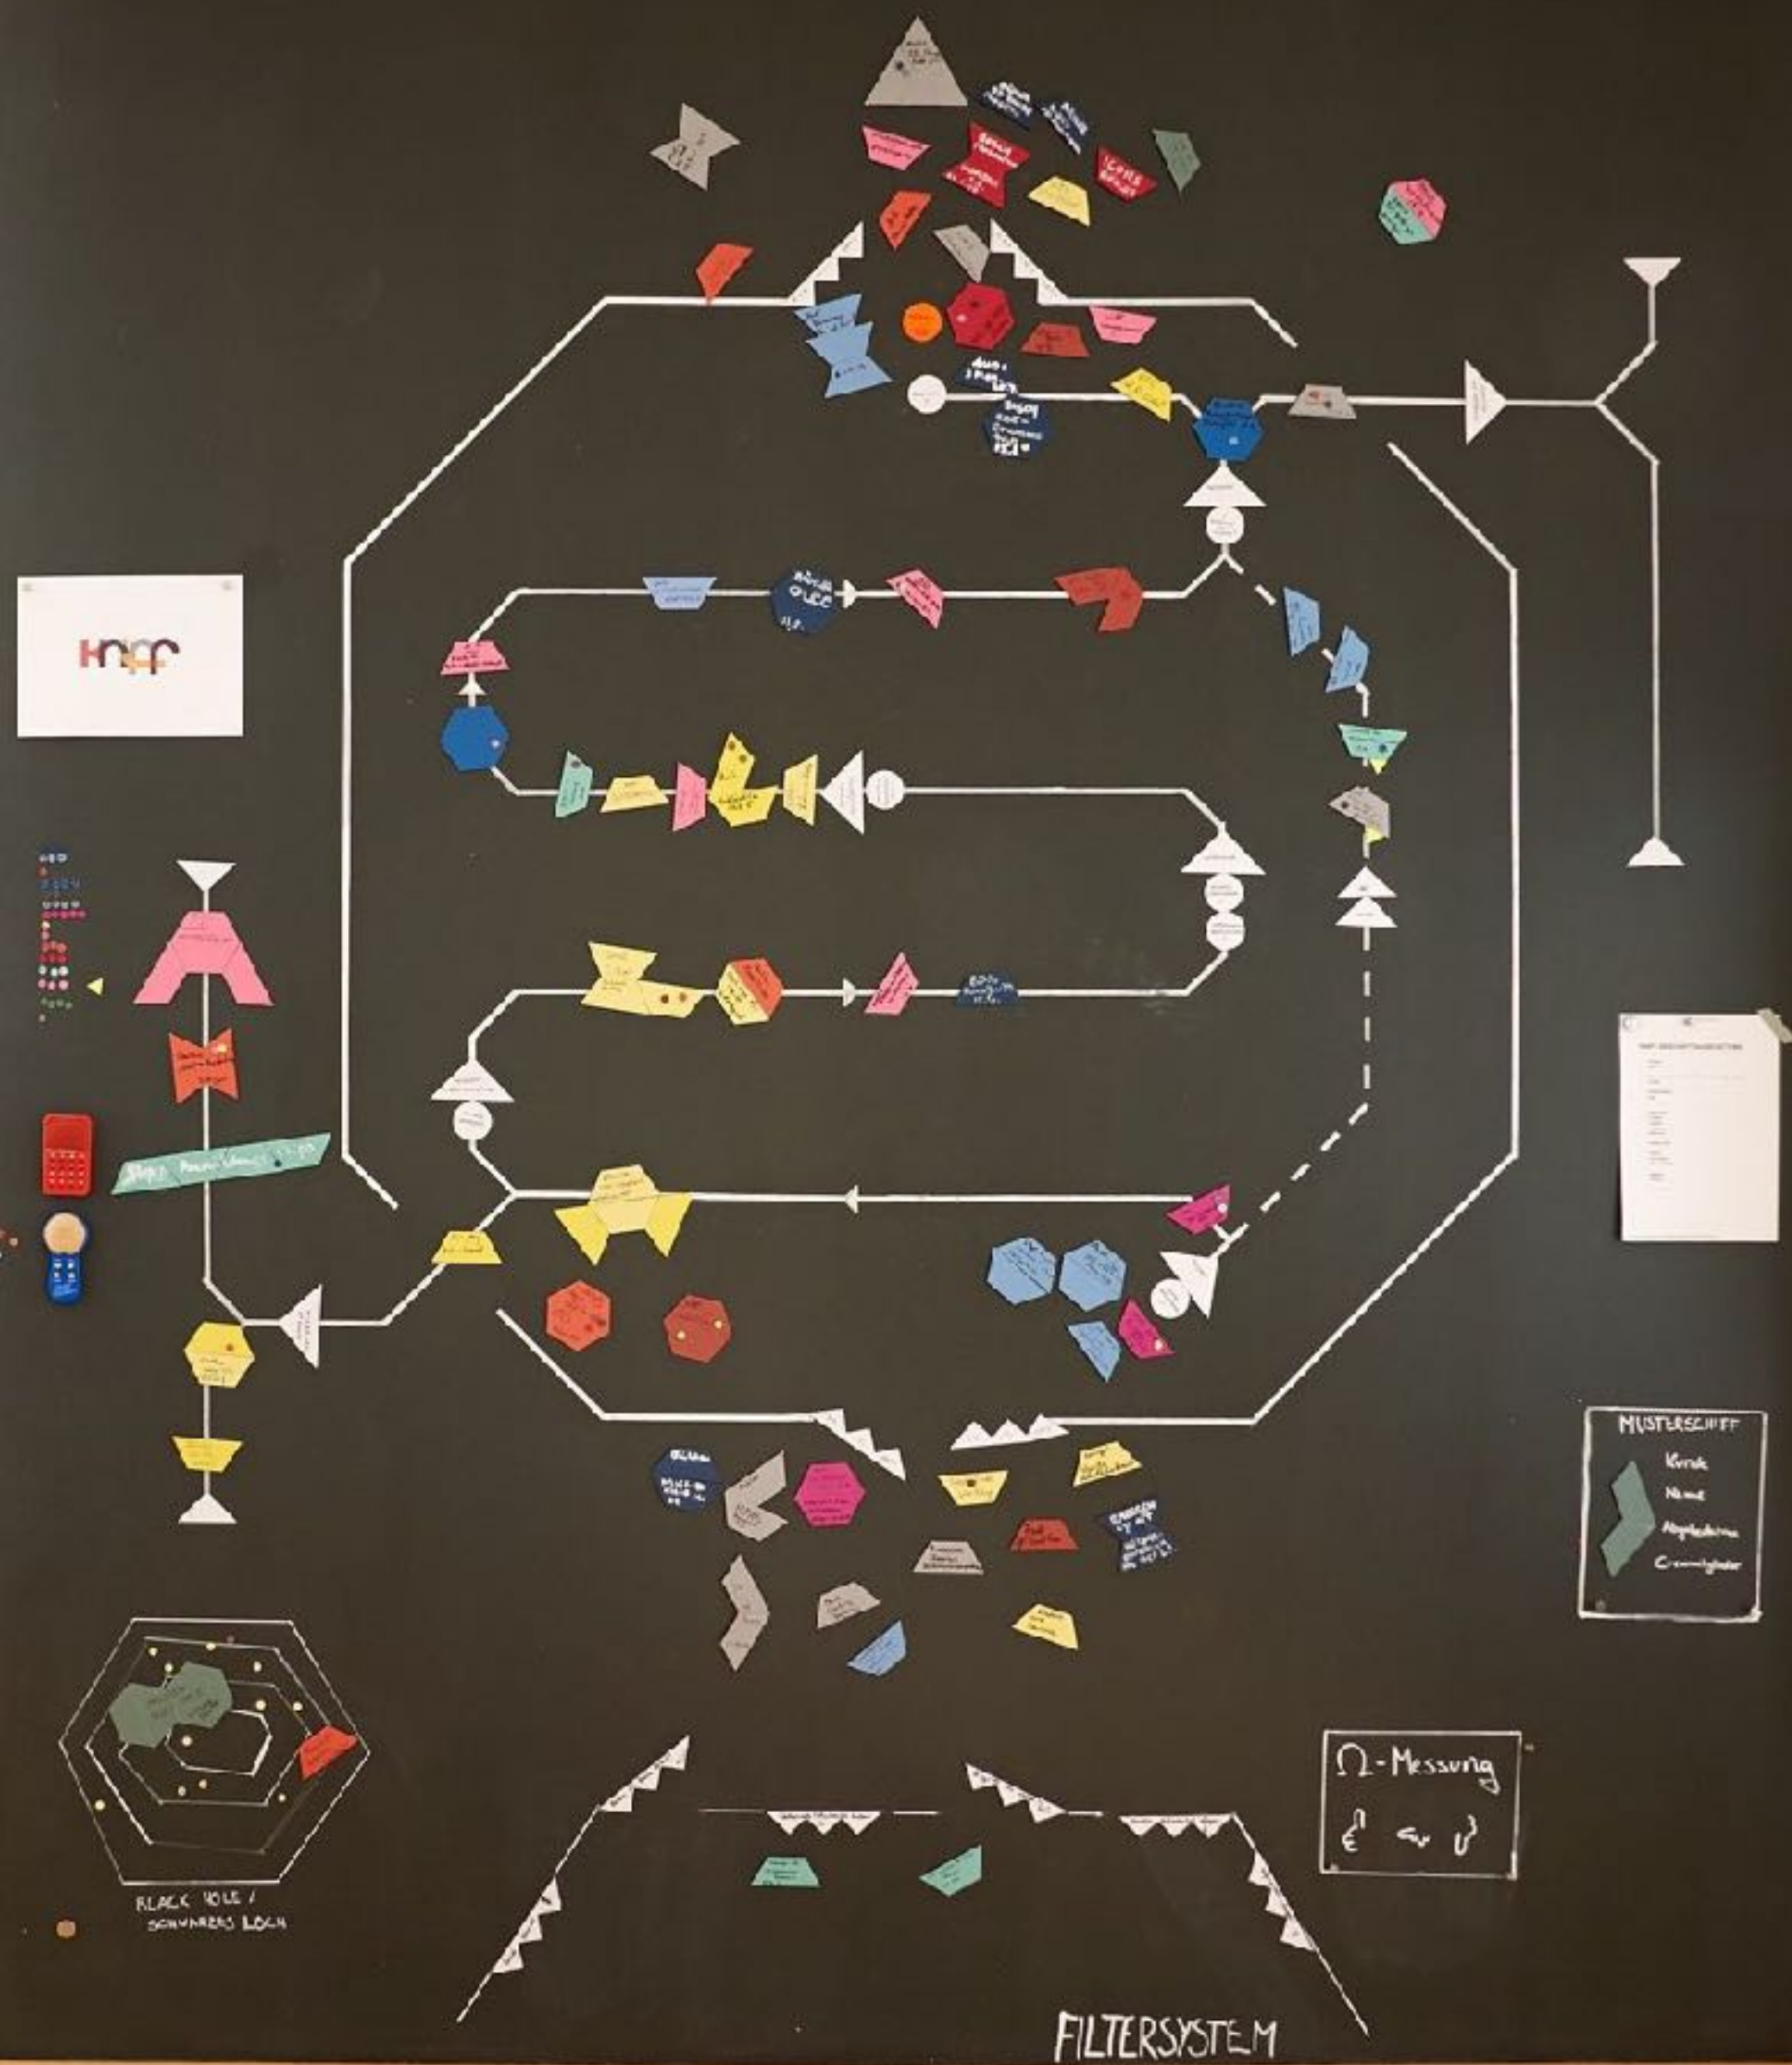

Natalie's Table

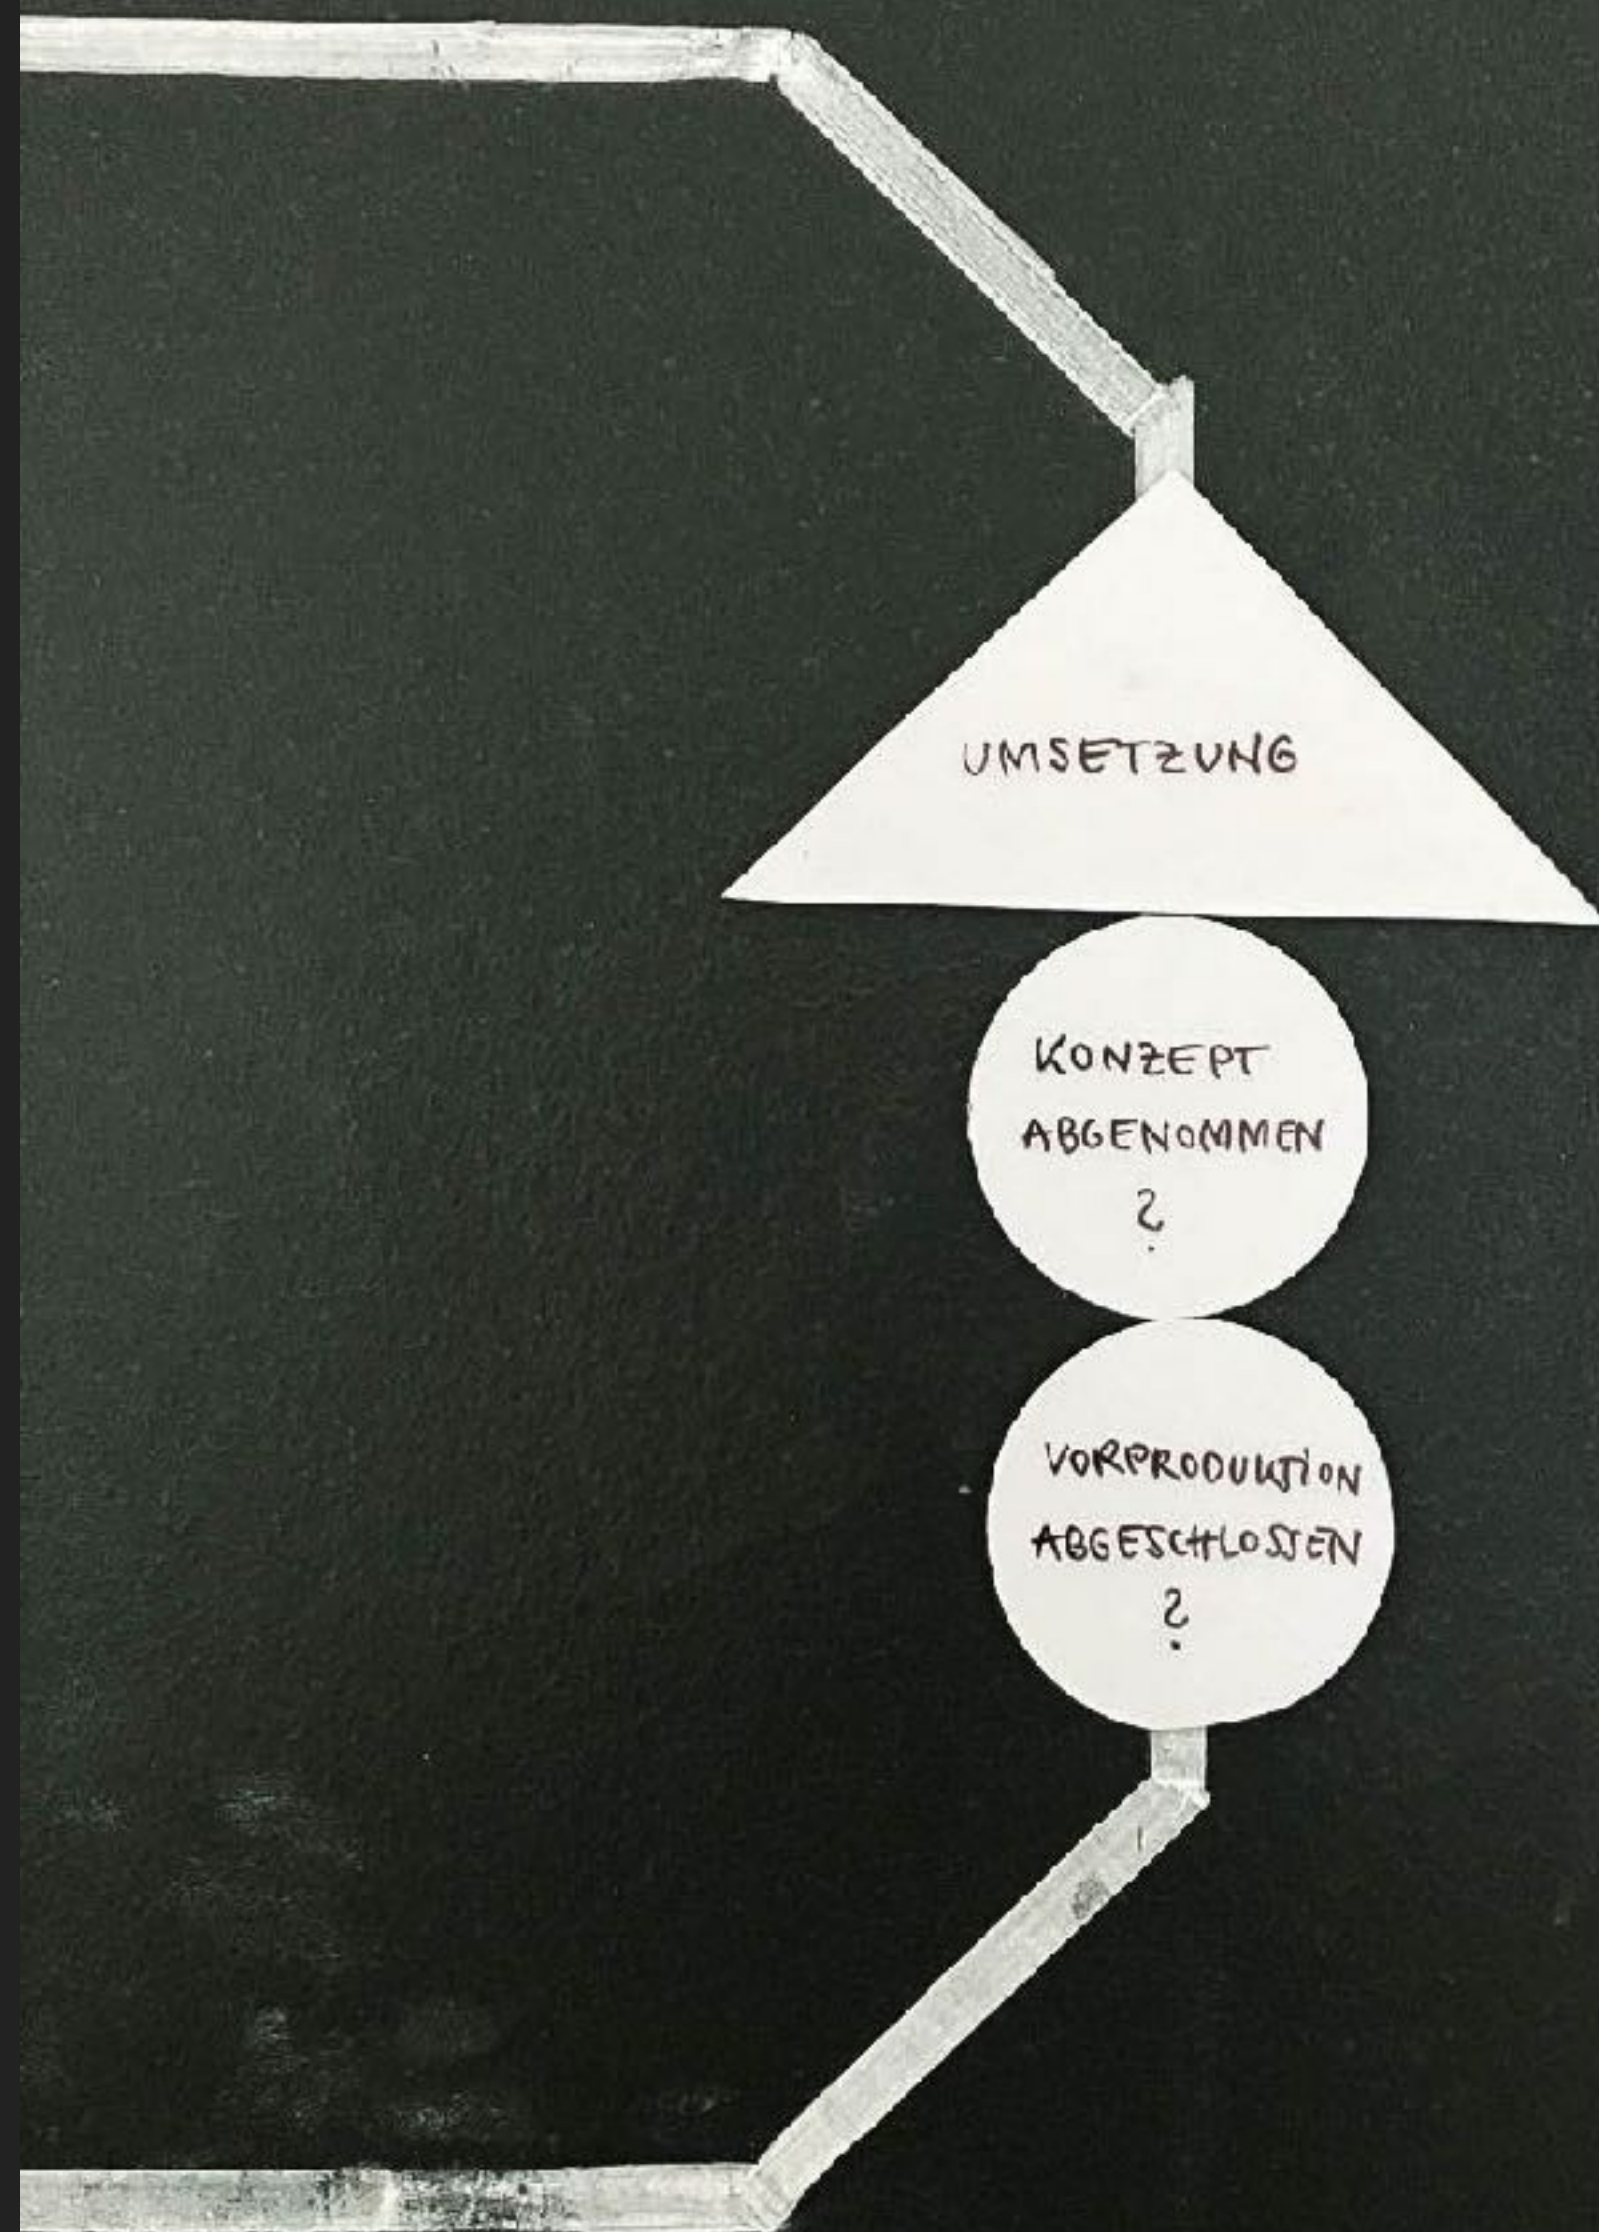

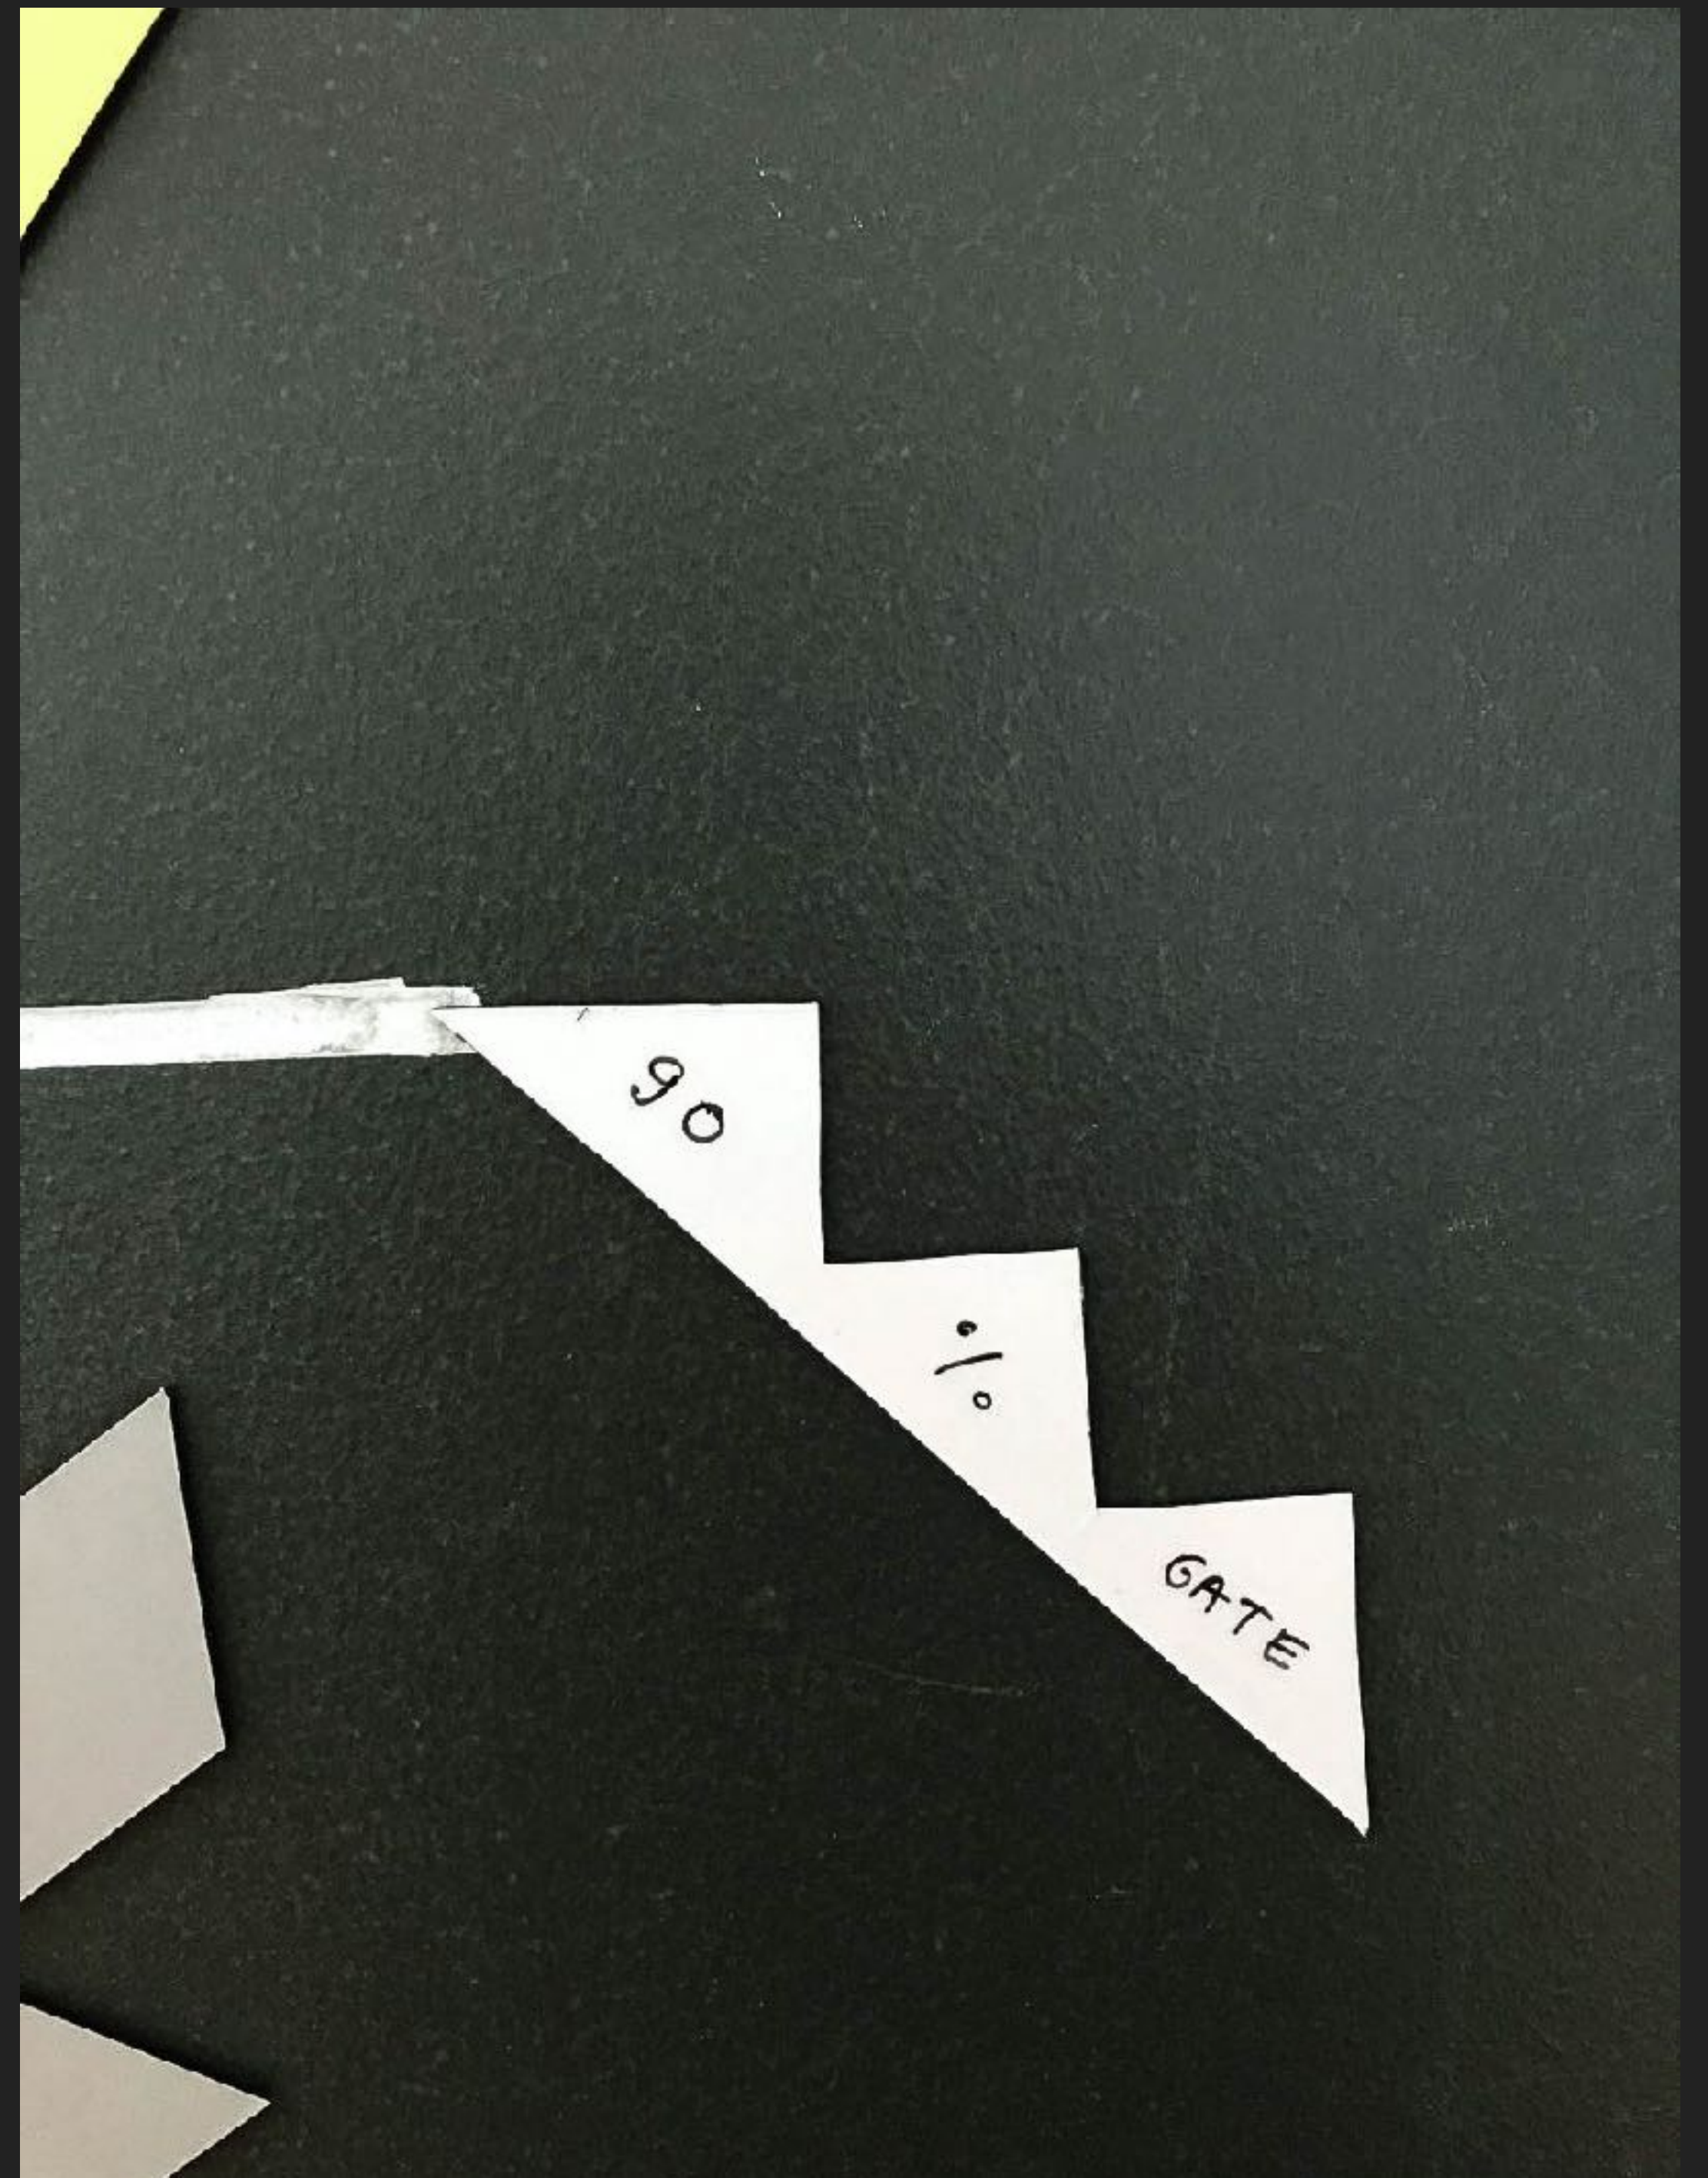

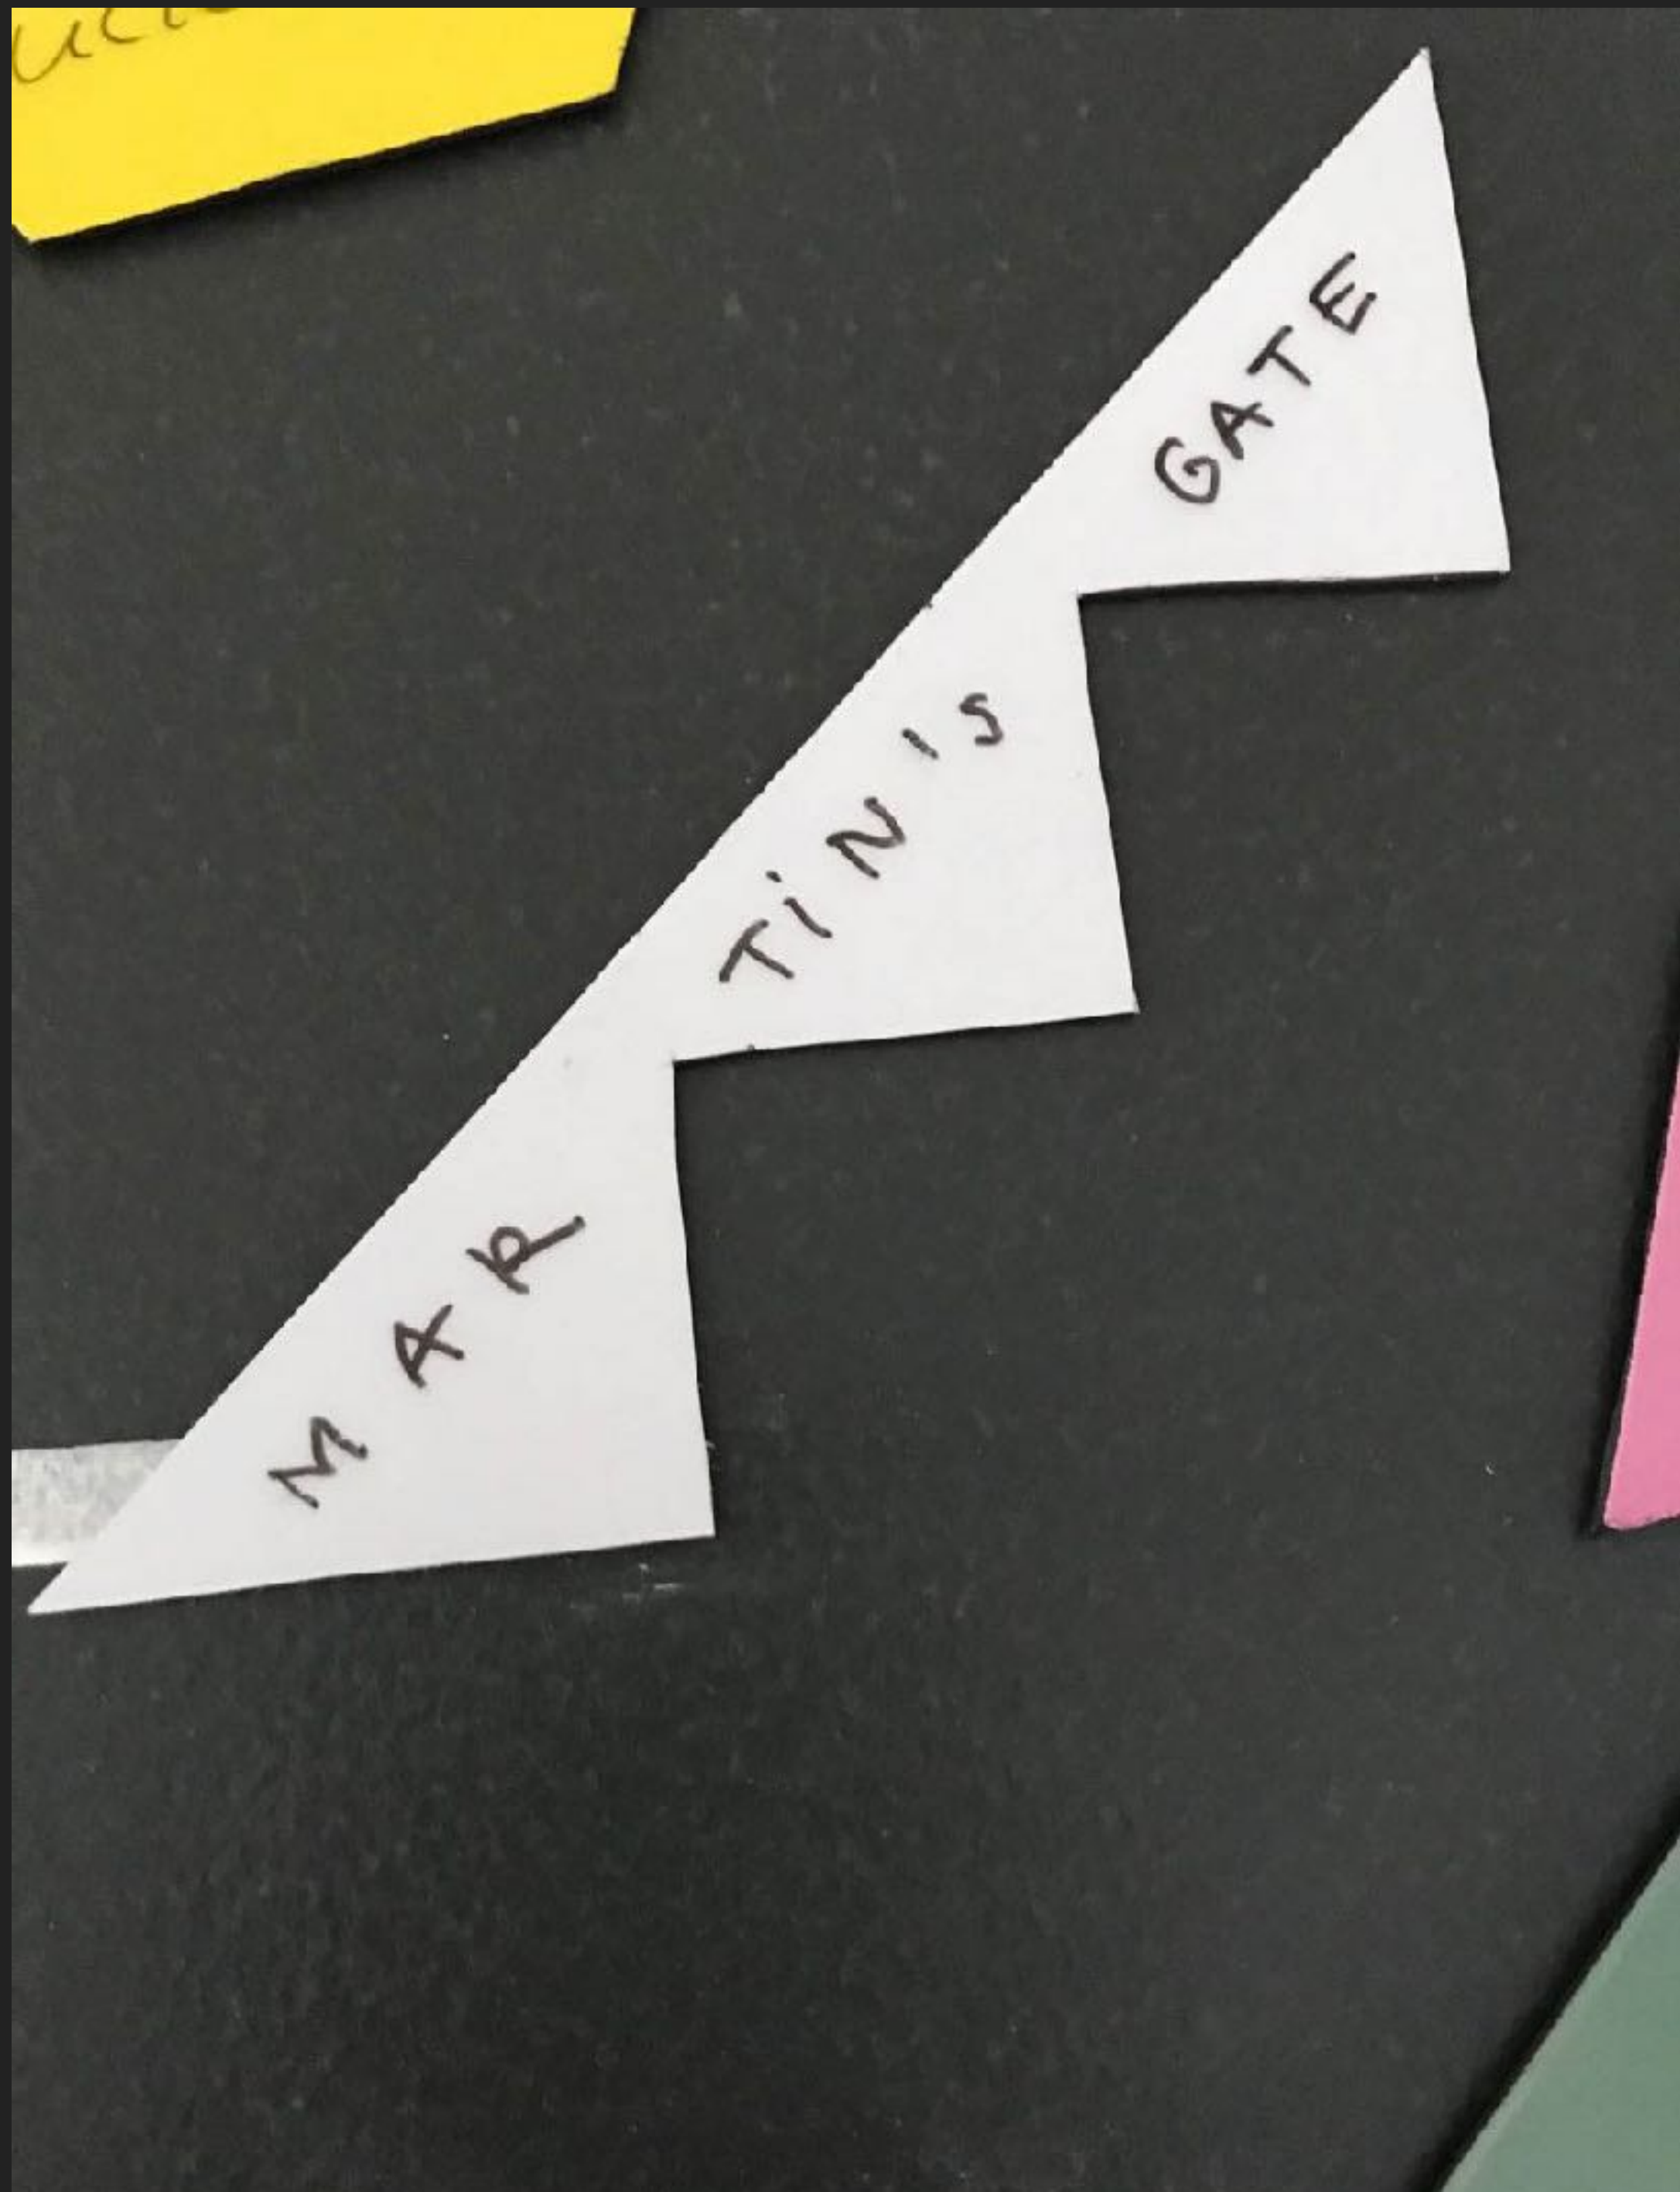

Isabel's Form

Why do we have fun with it?

Created out of the Context!

It is a Manifesto of Kniff's
Culture and our Social System.

We put effort in understanding
our System.

We did it =>

We all have a precious
treasure in our Organisation.
It is us.
