Lean is a lot like Chess. Only harder.

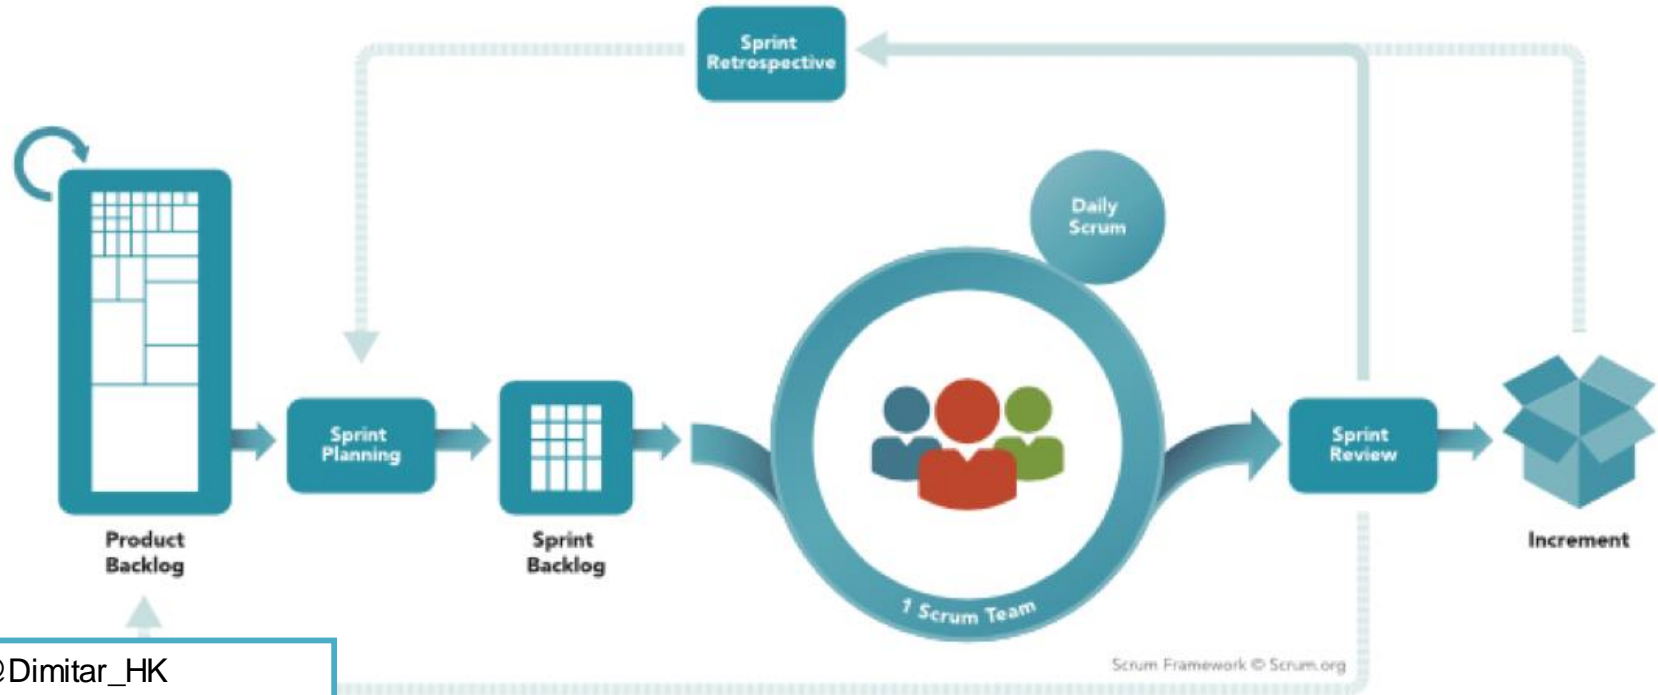

We've All Been Monkeys

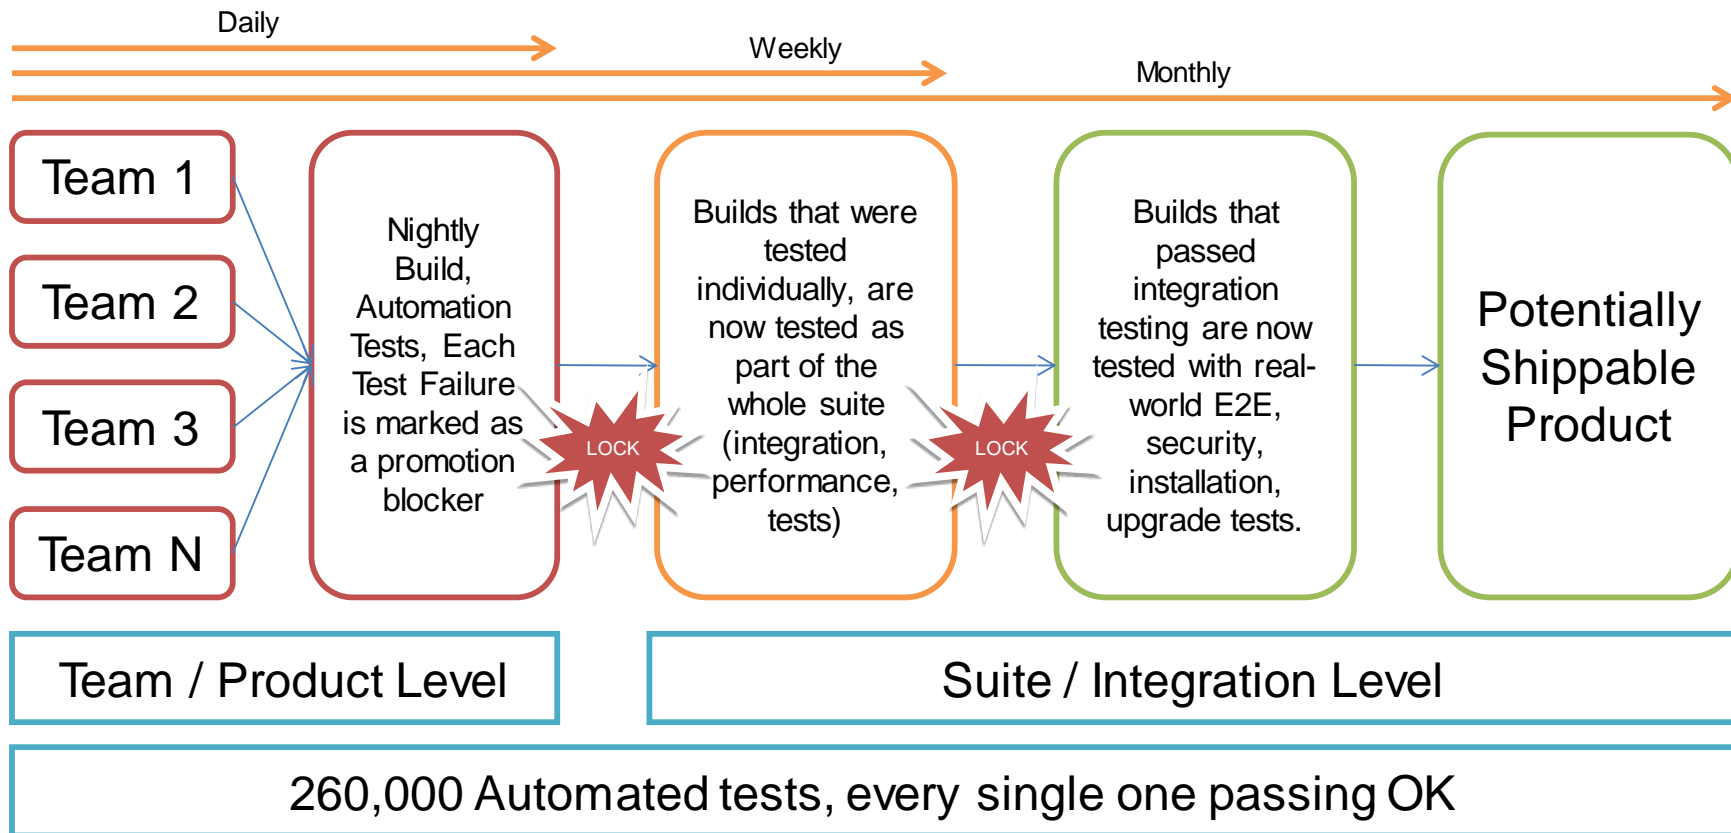

The First Person View of a Change Agent

SCRUM FRAMEWORK

The Promotion Process

Principle of Suboptimization

- Optimizing each subsystem **independently** will not in general lead to a **system optimum**, or more strongly, improvement of a particular subsystem **may actually worsen** the overall system.

The Feature Management

Invest. Area	# of Features	New	Refining	To Do	In Progress	Done	Accepted	Released Internally	Released
All	2133 (+11)	1490 (+2)	219 (-7)	97 (+3)	232 (+7)	23 (+4)	54 (+2)	18 (+1)	150
Area 1	191 (-1)	139 (-1)	13 (-1)	11 (+1)	23 (+2)	1 (0)	2 (-1)	2 (+1)	14
Area N

Company 2

1.

2.

1. Customer Issues
2. Regression Issues
3. Internal issues
4. Technical debt
5. New features

3.

1. Team agility

2. Quality (Stop & Fix)

3. Company agility

Emerging Principles

Principle I:

To "unstuck" a part of your workflow
visualize one level above and
manage flow on this higher level.

Principle II:

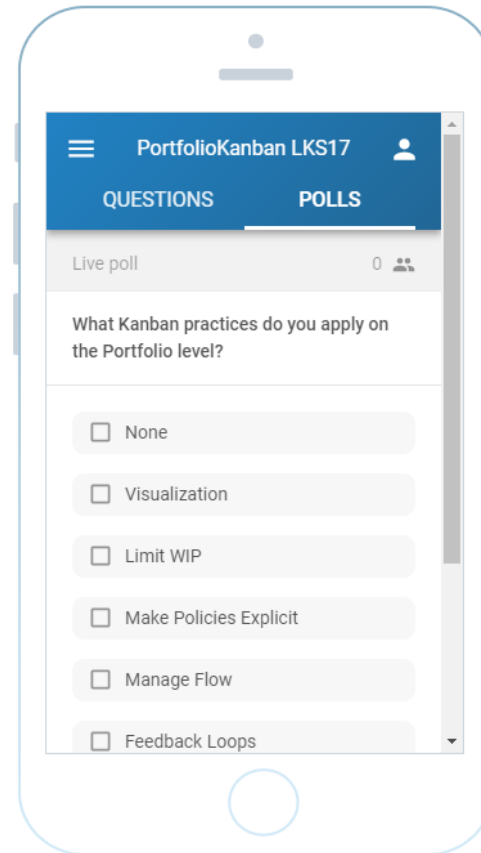

Implementing Portfolio Kanban
Leads to a **Hoshin**
Kanri implementation in one way or
another.

I am going to make a statement:

**If you try to improve, keep your
common senses and persist long
enough, you will invent Lean.**
